

## Amended and corrected tables from the Digest of UK Energy Statistics 2007 published on the BERR web site

Table 1.1-1.3	<b>Aggregate energy balance – 1999 &amp; 2003</b>
Table 1.4-1.6	<b>Value balance of traded energy</b>
Table 1.7	<b>Sales of electricity and gas by sector</b>
Table 1.1.2	<b>Availability and consumption of primary fuels and equivalents</b>
Table 1.1.5	<b>Energy consumption by final user - 2003</b>
Table 1.1.6	<b>Expenditure on energy by final user</b>
Table 3.4	<b>Petroleum products: Commodity balance - 2004</b>
Table 5.3	<b>Electricity: Commodity balances, public distribution system and other generators</b>
Table 5.7	<b>Plant capacity – United Kingdom</b>
Table 5.8	<b>Plant capacity – England and Wales, Scotland and Northern Ireland</b>
Table 7.1.1	<b>Renewable sources used to generate electricity and heat; electricity generated from renewable sources</b>
Table A.2	Estimated average gross calorific values of fuels
Table A.3	Estimated average net calorific values of fuels
Table F.2	Gas production

For the tables above in normal text, the amendments are minor typographical changes. Tables in **bold** contain amended or corrected data.

The web addresses for these tables are:
